The U.S. lift Truck division situated in Cleveland has a expert team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a national machinery expansion venture. Initial product sales of this industrial equipment focused on large business communities, the armed forces and on state-run companies. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Home-based forklift business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a situation of significant expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to counter act competitive pressures in the US materials handling market. This venture radically expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a modern plant which helped set up the company for the fabrication of high end added-value goods suited for export. In 1993, the corporation had a international sales system and started exporting models they had established through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas markets.
