

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV voyage. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

All through their trip, John reacquainted himself with past business associates along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial market for a product that could swiftly and safely elevate individuals in the air to accomplish maintenance and other construction functions.

After returning from their vacation, John set up a partnership with two of his friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design elements of that original lift into existing models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into several international markets and continues to develop innovative machines to guarantee that consumers are able to become safer and more resourceful within their workplace.
